## PROFILE

**Netaji Safe Company** is a reputed and trusted name which stands for Quality, Durability, Reliability and Affordability. Since more than 65 years Netaji Safe Company offers a complete range of Security Equipment : Fire and Burglar resisting Safe, Strong Room Doors, Safe Deposit Lockers, Coffers, Cupboards for Home / Office / Institutes etc.

We are based at Kolhapur, Maharashtra India and enjoy support of a clientele from all over the globe. The core concentration of our company is on the quality of products we manufacture and sell. Thus we do more of **Qualitative** business than Quantitative one. Being an age old company "Netaji Safe" is an established brand in safe and security products.

The Company was managed by Brothers Mr. Ramalal and Mr.Rikabchand Oswal & currently managed by Mr.Devichand Oswal. Providing quality work over the past has given us a definite edge over any competition in the Market. Our clients always insist on the quality standards which we have already set high. Thus we only cater to quality clients and don't beleive in quantitative production. We also have a Dealer based at Pune. This company called Gopal Agencies is associated with us since last 40 years, and looks after the clients based in Pune and nearby areas.

Nearly 3000 safes provided by Netaji are in operation currently throughout India. We have also started to cater to international market recently and already have more than 25 safes operational in New York, Dubai, Mauritius etc. We have served many reputed companies and organisations and have huge number of satisfied clients, Maharashtra Institute of Technology (M.I.T.) Pune, Sinhgad Technical Education Society (S.T.E.S.) Pune, Reliance Textile Depot, State Bank of India. etc to name a few.

**Note :**

**We provide customised service to fulfill our customer's requirements.**

**The Specifications & designs are subject to alteration for improvement from time to time.**

Single Door Fireproof Safe

Internal Design of Single Door Fireproof Safe

Double Door Fireproof Safe

Internal Design of Double Door Fireproof Safe

## HEAVY FIRE PROOF

**We manufacturer Heavy Fireproof Safes in various storage capacities ranging from size 28" to size 72", All our safes come with special features like -**

### Strong Seamless Body :-

The outer layer of body is tough tested quality **5mm** M.S. Plate with fully welded multi corner bend constructed without a single rivet on all side and armored with a Double duty barrier material providing massive resistance strength of 90 mm thick layer on each side of safe which defends the attack of sledge hammer, power drills, oxy-acetylene flame and arc cutting steel.

### Super Tough Door :-

The outer layer of the door slab is tough tested quality single solid M.S. Plate of **12 mm to 32 mm** thickness. It is further fortified by a composite **190 mm** thick layer of double duty barrier material and layers of flame and arc resistant alloy and hardened steel plates, which provide dependable protection against fire and attacks of power drill, oxy-acetylene flame and arc cutting. the total thickness of protective layer is strong over vital parts and is in vertical position with Un-pickable locks with high precision, superior quality dual control 10-lever 2 locks with stainless steel body and brass levers. Additional provision is made for digital or combination lock. The doors also have central 3mm aluminum plate for additional security and we use S.S. handles for lifelong durability.

### Hinges / Pivets System

It is specially designed as per the weight of door slab with solid polished M.S. Bar of **75 mm** & further given the hardness process to work properly & easily for the lifetime. It is mounted vertically on the safe. The upper part is fitted in the body & the lower one on the door slab by heavy strong bolts.

### Various Locking Systems

Superior high quality (Made in USA) digital and combination locks by La guard with Automatic Re-locking system.

### Bolt Work Mechanism

Strong movable shooting bolts of **38 mm** on front & back, equally spaced to secure the door equipped with the impact resisting shaft.

### Attractive Finish & Rust Protection

Attractive two tone smooth finish which is scratch free and long lasting because of multi-coat rust proof powder coating.

### Internal Design

The safes are provided with 2-3 adjustable shelves made of 1.6 mm thick steel and 2 bottom mounted drawer units with one basement.

| No. | Outer Size H. W. D. | Ineer Size H. W. D. | Weight (Approx) |

## STRONG ROOM DOOR WITH GRILL GATE

### SUPER TOUGH DOOR

The outer layer of the door slab is tough tested quality M.S. Plate of **12 mm** to **32 mm** thickness. It is further fortified by a composite **190 mm** thick layer of tested double duty barrier material and layers of flame and arc resistant alloy and hardened steel plates, which provide dependable protection against fire and attacks of power drill, oxy-acetylene flame and arc cutting. The total thickness of protective layer is strong over vital parts with Un-pickable locks with high precision, superior quality dual control 10-lever 2 locks with stainless steel body and brass levers. Additional provision is made for digital or combination lock. The doors also have central 3mm aluminum plate for additional security and we use S.S. handles for lifelong durability.

### Frame Work

Tested quality 'L' type frame of 10mm or 'C' type 6mm thick M.S.Plate bent angle door frame, the door frame is reinforced along the height and width for strength and rigidity. A "Box Rebate" is plug welded to the frame to provide strong support for shooting bolts. Dual protection is provided over the entire lock case area of 1.75 Sq.mtrs.

### Bolt Work & Locking Mechanism

The door is provided with 12 shooting bolts (each of **38 mm** ) six in front, six at rear, which slides behind the tough "Box-jamb" rebate. These bolts can be activated simultaneously by the movement of the handle.

### Hinges/pivets System

It is specially designed as per the weight of door slab with solid polished M.S. Bar of **75 mm** & further given the hardness process to work properly & easily for the lifetime. It is mounted vertically as well as horizontally & fitted with heavy strong bolts on the door & frame. It has special pressurized adjustable bolts to give proper & easy opening.

### Various Locking Systems

Superior high quality (Made in USA) digital and combination locks by La guard with Automatic Re-locking system.

### Ventilating Grill Gate

The grill gate is constructed with heavy round **19 mm** M.S. solid polish bars at staggered pitch and secured with high precision 8 levers unpickable lock operating on both sides provided with stainless steel keys in duplicate.

| No. | Particulars | Outer Size (Frame) H. W. | Inner Size (Door) H. W. | Weight (Approx) |

Double Door S.S. Safe

Single Door S.S. Safe

Single Door S.S. Safe with double handle

## Stainless Steel Fire Proof Safe

Why do we use stainless steel plate for front door of fire proof safe and strong room door ??

**The reasons are:-**

1. Oxy-acetenlye flame can't attack or cut the stainless steel.
2. Stainless steel is rustproof for lifetime.
3. The safe looks totally different from any other safe or door.
4. Stainless steel is more harder metal than M.S steel.

### Strong Seamless Body :-

The outer layer of body is tough tested quality **5 mm** M.S. Plate with fully welded multi corner bend constructed without a single rivet on all side and armored with a Double duty barrier material providing massive resistance strength of 90 mm thick layer on each side which defends the attack of sledge hammer, power drills, oxy-acetylene flame and arc cutting steel.

### Super Tough door :-

The outer layer of the door slab is **3mm** stainless steel (304) and inner layer is tough tested quality single solid M.S. Plate of **12 mm to 32 mm thickness.** It is further fortified by a composite **190 mm** thick layer of double duty barrier material and layers of flame and arc resistant alloy and hardened steel plates, which provide dependable protection against fire and attacks of power drill, oxy-acetylene flame and arc cutting. the total thickness of protective layer is strong over vital parts and is in vertical position with Un-pickable locks with high precision, superior quality dual control **10-levers 2 locks** with stainless steel body and brass levers. Additional provision is made for digital or combination lock. The doors also have vertical **3 mm aluminum plate** at center for additional security and we use S.S. and Brass handles for lifelong durability.

### Hinges / Pivets System :-

It is specially designed as per the weight of door slab with solid polished M.S. Bar of **75 mm** & further given the hardness process to work properly & easily for the lifetime. It is mounted vertically on the safe. The upper part is fitted in the body & the lower one on the door slab by heavy strong bolts fixed from inside.

| No. | Outer Size (H.W.D.) | Inner Size (H.W.D.) | Weight (Approx.) |
